

## Introducing Exabeam

The Industry's Leading Platform for Al-Driven Security Operations

## Exabeam

The Leading Al-Driven Security Operations Platform

**CAPABILITIES** 

SIEM, UEBA, SOAR, Insider Threat, TDIR, Compliance

STABLE & SCALABLE

99.9% Platform Uptime

**500+** 

**TB Daily Peak Ingestion** 

INNOVATION

25 Cybersecurity patents, the majority are for Al

GLOBAL CUSTOMERS

620+

RECOGNITION

5x Leader of the Gartner MQ

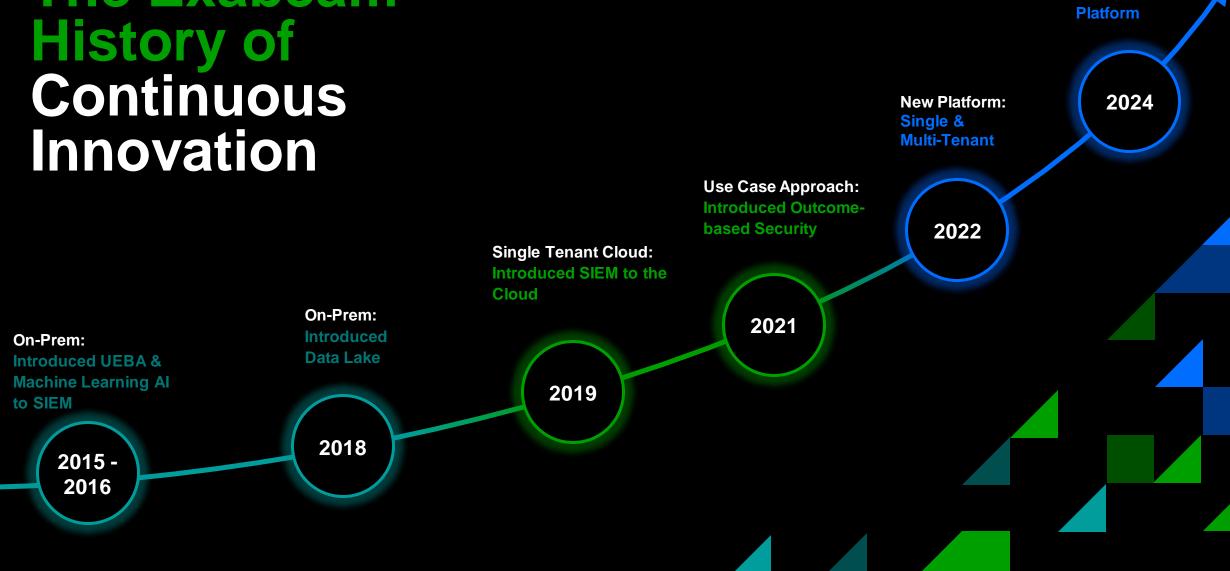

IMPACT

>1,800

Behavioral rules & Al models for unparalleled detections

# The Exabeam

**End-to-End Cloud Native** 

## Solve TDIR Challenges

REPORT FINDINGS

Investigations were too slow

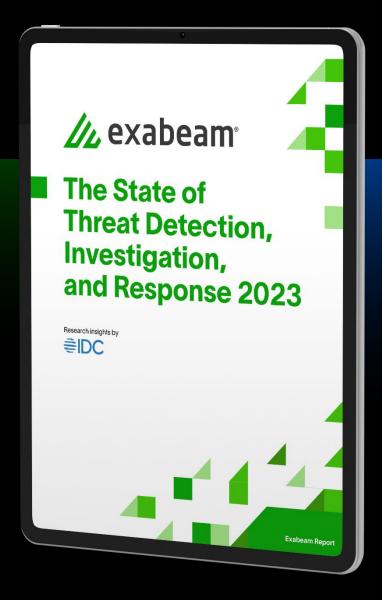

Limited visibility across their environment

They lacked incident response knowledge

They needed automation across the TDIR workflow

## What makes Exabeam Unique?

#### DIFFERENTIATORS

Exabeam was the first to put Al and machine learning in our products to deliver behavioral analytics on top of SIEM.

#### TIME-TO-VALUE

Detected blind penetration test during first two-weeks in production. Untrained SOC analysts were able to detect, triage, and remediate in 15 minutes using Al-driven risk detection out of the box rules

- ✓ Global Technology
- Logistics and Financial Services Provider

Exabeam is the only company that baselines and understands normal behavior so you can identify the abnormal and take action.

#### INSTANT ROL

Understanding what was normal vs. abnormal saved \$2M in password reset support ticket costs. A savings of 60,000 hours/year in employee productivity; 180,000 hours in 3 years

✓ Global Technology Solutions Provider

Exabeam is the only vendor who has a product that can look at and take in all your data at scale and match it to outcomes.

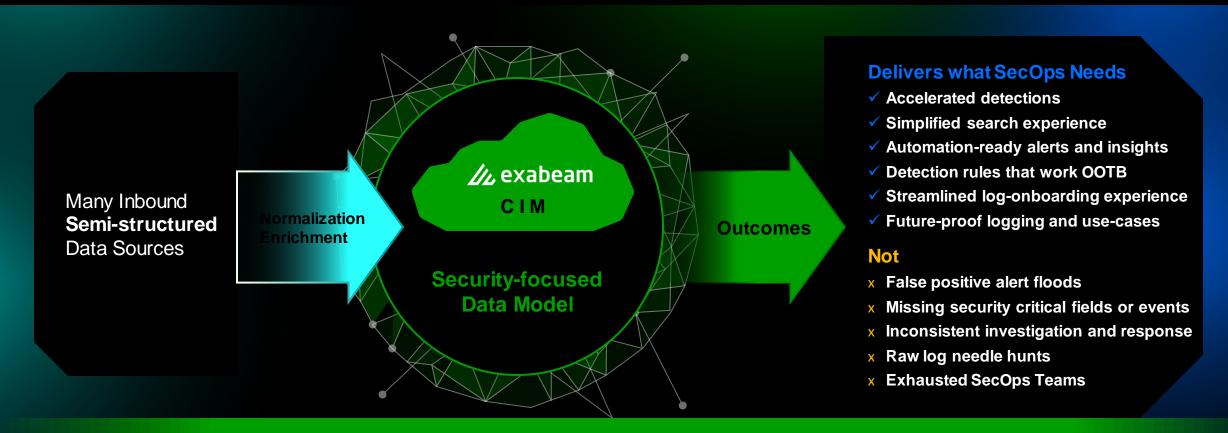

#### REAL SECURITY OUTCOMES

Able to identify security blind spots with automated mapping of data sources to security outcomes. Using hard data from Exabeam to onboard data sources and plan for new Exabeam expansions

✓ Regional Healthcare Provider

## The Exabeam Common Information Model (CIM)

SECRET SAUCE TO DELIVERING EFFECTIVE AI-DRIVEN SECURITY OPERATIONS

Weak information models can't deliver Al-Driven insights

## Exabeam leads in AI/ML in this Market

#### AI-DRIVEN SECURITY INTELLIGENCE FOR 10+ YEARS

## Exabeam Analytics AI/ML

Established Leader

- ✓ Pioneered anomaly detection via ML (UEBA)
- Threat detection and prioritization
- Near real-time across all data sources
- ✓ ML monitoring of log source health / volume
- Only viable solution to insider threats and compromised credentials

## **Exabeam** Copilot

GenAl

New

- Conversational experience
- ✓ Powerful, natural language prompted search
- ✓ Threat explainers
- ✓ Faster threat hunting
- Easier on-boarding with less training

**Credential Stuffing** 

**Dormant Accounts** 

**Account Manipulation** 

**Data Exfiltration** 

**Audit Tampering / Data Destruction**

**Excess Permissions** 

Misconfiguration / Data Leak

**Credential-Based Supply Chain Attacks** 

# Meeting you where you are

MODULAR PLATFORM

**Augment** 

Using a SIEM / data lake, but need to augment or add Insider Threat capabilities with an advanced Al-Driven Security Operations Platform with continuous risk scoring and behavioral anomaly detection

Full SIEM

Outgrown capabilities of your current SIEM or don't have a SIEM and need an Al-Driven Security Operations platform that includes SIEM, advanced analytics, and automation

#### Intelligence

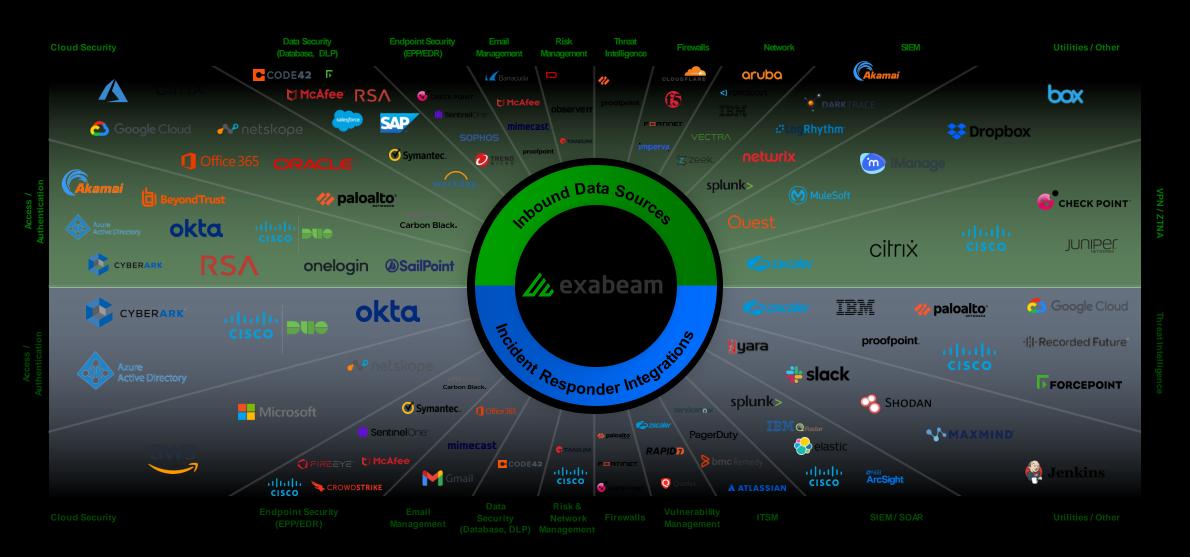

Learning

#### Investigation

- Rich Event Timelines
- Interactive AT Co-pilot
- Reporting and Dashboards

#### Robust ecosystem with ~700 integrations

Note: Integrations show n are only a select number of connections we have built

## Why Exabeam?

#### CUSTOMER TESTIMONIALS

## Enables efficient search at scale.

"Exabeam has solved the struggles with searching at scale. I run the search, and the results show before I can get out of my chair."

✓ Banking and Financial Services Provider

## Detects insider threats with UEBA.

"We discovered abnormal access behavior and stopped a leaver from stealing confidential company information."

 Global Manufacturer and Services Provider

## Easy to use and build automations.

"We found IBM and Splunk too time-intensive and required too much manual intervention to do investigations."

 International Footwear and Accessories Brand

# Thank you for your time today
