

CORPORATE OVERVIEW

Cyber threats are accelerating like never before, and large enterprises are struggling to provide their own security. Cyderes acts as custodians of our clients' information security, so that they can focus instead on growing their business.

Founded in 2003, Cyderes is a global, pure-play, full life-cycle cyber security services provider with award-winning managed security services, identity and access management, and professional services designed with the speed and agility to support the modern enterprise. Cyderes provides the people, processes, and technology to manage risk, and detect and respond to any threats – in ways that are better, faster, more cost-effective, and more scalable than traditional in-house solutions. Cyderes has five global offices and four security operations centers (SOCs) across the United States, Canada, the United Kingdom, and India.

WHY CYDERES?

- 800-plus employees; 100% cybersecurity focused
- Recognized as one of the industry's most innovative cybersecurity companies
- Speed and agility across complex multi-vendor environments
- Partnerships with best-of-breed providers
